Sabrient Ratings

Sabrient's Buy/Hold/Sell ratings are based on a combination of dynamic filters that determine which attributes of a stock are most predictive in the prevailing market and which stocks best reflect those attributes but are not yet rewarded.

Sabrient starts with an "extraction" process that uses the best performing filters to identify stocks having certain compelling attributes currently sought by the market. Then, a composite scoring process uses a weighted average of several key scores to quantify the relative likelihood of upside or downside price action. As a result, the Buy/Hold/Sell rating may, in certain cases, seem inconsistent with a simple average of the scores cited in this analysis.

A BUY rating means the stock is expected to outperform its relevant benchmark substantially over the next 6 months. A SELL rating means the stock is expected to underperform its relevant benchmark substantially over the next 6 months. A HOLD rating means the stock is expected to perform in line with its relevant benchmark over the next 6 months.

If a stock is rated HOLD, the investor should review the stock's history of Sabrient ratings to see if it has recently changed to HOLD from BUY or SELL. If so, this indicates one of the following: (1) there has been a significant change in the stock's fundamentals, (2) the stock is already appropriately rewarded or punished by the market, or (3) there simply has been some recent price consolidation that warrants attention. A reading of Sabrient's analysis should identify which it is.

Sabrient Analysis

Sabrient rates AAPL a Buy for its top growth and momentum scores.

- **Growth:** AAPL earns exceptional marks as a growth stock with a Sabrient Growth Score of 94.3. Rigorous backtesting reveals that stocks with similar growth profiles outperform the market in the long term. A high growth stock does carry the risk of substantial downside price movement if the company should miss its earnings targets.
- **Momentum:** Recent accumulation finds the stock in the top echelon of the large-cap segment with a Sabrient Momentum Score of 91.1. The score reflects price, earnings and group momentum.
- **Value:** A comparison of AAPL's fundamental valuation with its growth prospects results in a Sabrient Value Score of 52.9. This implies the stock is fairly valued at its current price.

Current Sabrient Scores Compared with Industry and Relevant Benchmark

These Sabrient scores compare various aspects of APPLE with its industry and relevant benchmarks. The scores are percentile rankings from 0 to 99.9. Higher scores are better. We use a weighted average of several key scores to quantify the relative likelihood of upside or downside price action. Therefore, the Sabrient rating may seem inconsistent with a simple average of the scores cited in this analysis.

Growth Score: 94.3

The Sabrient Growth Score reflects a company's historical and projected earnings growth, revenue and sales growth, projected cash flow, analyst activity, and changes in earnings estimates, each over various time periods. The higher the score, the better the combined performance of these key measures. With a Sabrient Growth Score of 94.3, Apple Inc is considerably higher than the average of its industry group, which has a Sabrient Growth Score of 69.0.

Value Score: 52.9

The Sabrient Value Score measures the relationship between a company's stock price and its intrinsic value, as indicated by earnings and balance sheet attributes, with an emphasis on earnings. Also considered are cash flow measures and fundamental valuation ratios. With a Sabrient Value Score of 52.9, Apple Inc is marginally higher than the average of its industry group, which has a Sabrient Value Score of 49.7.

Momentum Score: 91.1

The Sabrient Momentum Score measures a company's earnings and price momentum, evenly weighted, and augmented by group strength, money flow, and relative volume. Core technical factors include current price relative to periodic highs and moving averages. With a Sabrient Momentum Score of 91.1, Apple Inc is considerably higher than the average of its industry group, which carries a Sabrient Momentum Score of 65.0.

Earnings Score: 68.3

The Sabrient Earnings Score assesses a company's overall earnings performance and projected outlook. Time periods include an average look-back of three years with an emphasis on the past four quarters and a forward look of one to five years. With a Sabrient Earnings Score of 68.3, Apple Inc is marginally higher than the average of its industry group, which has a Sabrient Earnings Score of 60.0.

Balance Sheet Score: 65.6

The Sabrient Balance Sheet Score measures a company's liquidity and debt issues, as well as receivables and inventory quality. This score is used to assess relative risk associated with a stock: the lower the score, most likely the higher the inherent risk. With a Sabrient Balance Sheet Score of 65.6, Apple Inc is marginally lower than the average of its industry group, which carries a Sabrient Balance Sheet Score of 70.2.

Fundamental Score: 86.8

The Sabrient Fundamental Score is the broad measure of a company's financial health, including its balance sheet, cash flow, revenue, and earnings quality. With a Sabrient Fundamental Score of 86.8, Apple Inc is moderately higher than the average of its industry group, which carries a Sabrient Fundamental Score of 66.9.

Timeliness Score: 96.7

The Sabrient Timeliness Score is an assessment of a stock's short and long-term price strength as determined by various chart-based indicators and measures of group momentum and relative price performance. With a Sabrient Timeliness Score of 96.7, Apple Inc is substantially higher than the average of its industry group, which carries a Sabrient Timeliness Score of 64.2.

Sabrient Analysis continued from Page 1

- **Timeliness:** AAPL has a Sabrient Timeliness Score of 96.7. This measures technical strength based on short-term and long-term price performance and long-term group strength.
- **Best Performing Filters:** To determine the likelihood of near-term performance, Sabrient builds and backtests "Smart Filters" to establish which caps, styles and attributes are drawing a premium in today's market. Currently, the three most predictive filters for the relevant segment are:

Consistency Filter: The Consistency Filter measures various earnings trends, along with short-term revenue growth. High scores are given to stocks that exhibit a smooth expansion in earnings and notable short-term revenue growth. The filter is currently among Sabrient's best performers in the large-cap segment. AAPL scores 89.0 for this filter.

Earnings Strength Filter: The Earnings Strength Filter seeks stocks with favorable earnings trends by measuring short-term and long-term earnings history, short and long-term earnings projections, as well as percentage change in both over the short term. Over the past 90 days, the filter outperformed its large-cap benchmark by a significant margin. AAPL scores 67.7 for this filter.

Composite Growth Filter: The Composite Growth Filter includes long-term and short-term factors related to earnings, cash flow and revenue growth. The filter has significantly outperformed its large-cap benchmark over the past three months. AAPL scores 86.2 for this filter.

In summary, excellent momentum and growth attributes garner AAPL a Buy rating. This analysis should be considered in light of the recent behavior of the market, discussed below.

About Sabrient

Sabrient Systems is an independent research firm providing statistical analysis of a company's fundamental data to investment professionals. We use a computer-driven, quantitative methodology to identify stocks that appear poised to outperform or underperform the market.

The Sabrient methodology was developed by an experienced research team led by David Brown, a former NASA scientist and retired CEO of Telescan and designer of its premier stock search program, ProSearch. The research team employs a scientific approach to the creation and testing of multi-factor filters. Each filter targets a key area of traditional stock analysis, including value, growth, momentum, fundamentals, earnings, balance sheet, and group strength. Using an adaptive process, filters are continually tested and monitored to ensure that only the best performing filters are at work.

Sabrient's ratings begin with an extraction process in which each of the few best-performing filters scans the universe of equities to identify stocks having certain compelling attributes sought, but not sufficiently rewarded, by the current market. Then, a composite scoring system employs a broader set of "weighting" filters to rank the extracted stocks. To support individual investors, Sabrient uses the same sophisticated methodology to provide individual stock reports on a universe of approximately 5,600 stocks.

Sabrient regularly tests the performance of its stock selections, using its primary list of published rankings and statistical techniques it believes appropriate. These recommendations have consistently outperformed relevant benchmarks across a broad range of investing styles, market caps, time frames and market conditions, demonstrating the robustness of Sabrient's proprietary methodology. While past performance is no guarantee of future results, Sabrient believes it can maintain its strong performance through its rigorous, scientific approach to filter construction and ongoing backtesting within a dynamic and adaptive composite scoring system.
